Care & Maintenance

Preparation
* Wash and clean the water supply pipeline.
* Check installation instructions to ensure correct installation.

Conditions for use
* Water pressure condition: 0.05~0.5MPa
* Recommended maximum water temperature: 60℃
* Not for use as a steam outlet.

Cleaning the surface
* Do not use abrasive cleaners or solvents on the product.
* To avoid scratching the surface, do not use abrasive materials such as scouring pad.
* Wrap a thick cloth around the product to prevent scratching or other damages during installation.

Extreme Low Pressure Configuration
* Should you experience extremely low water pressure (<0.1MPa) or prefer a stronger water pressure during your shower, you may gently remove the regulator as per instructions below.
